Defining the Overtone

The word Overtone is defined as a musical tone that is a part of the harmonic series above a fundamental note and may be heard *with* the fundamental note.

It is also a **subtle** or subsidiary quality, implication, or connotation, meaning it isn't what is leading but is influencing the overall affect.

Venus Overtone Contribution in the World

The energy of our Venus Overtone influences our whole life, and is why we refer to Her as the Meta-Goddess.

She is Transpersonal rather than personal bridging the divide between our personal journey and the bigger collective story we are also experiencing.

Life is more fulfilling when we are being informed by and in service to our Venus Overtone Meta Goddess.

This is confirmed when we look at the Overtones of Famous Individuals truly living their Soul's intent through the content of their work in the world when aligned with their Overtone Meta-Goddess

Leo Venus Overtone

What would it take for me to live a daily practice of loving myself no matter what is happening in my outer reality, so I feel confident to show up and shine my light

Questions

How often can the Overtone or Meta Goddess change during a lifetime?

Why do you use the Sign Venus is in when Rising as Morning Star and not when she is conjunct the Sun? If Venus is conjunct the Sun in One Sign but rises in another- as is happening in October/November 2018 when Venus is conjunct Scorpio but rises in Leo – does that mean there is still a Scorpio flavor to this upcoming Libra Overtone or Meta Goddess?

Cayelin's Answer: You are bringing up some very interesting thoughts to consider and it is helpful to remember there are no right or wrong answers.

This is all exploratory territory. However, from the lens of Shamanic Astrology the Overtone is calculated for the morning sky rise creating a direct visual experience.

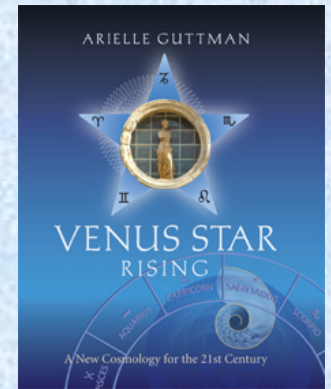

Ancient cultures had a general sense of Venus with the Sun for 8 days knowing the exact conjunction was happening during that time, but they didn't have tables that calculated the exact Venus Sun conjunction. They were, however, watching for her appearance in the East before Sunrise to know when to begin the cycle.

This is similar to what many cultures have done with the New Moon, using the first visible crescent of the Moon to celebrate the New Moon in the sky. It is only in recent times the New Moon is calculated for the exact Sun and conjunction. There were ceremonies done in the Dark of the Moon and perhaps during the dark of Venus, honoring the end of the previous cycle and preparing for the new cycle when either the Moon or Venus became visible.

Cayelin's answer continued: Most astrologers do start the synodic cycles with the Sun conjunctions...because its so easy to calculate these days.

For example; Arielle Guttman's book on *The Venus Star Points* uses both the direct and retrograde Sun conjunctions to determine the Venus Star Point, narrowing it down to these two points only. She has successfully created a way of looking at Venus with this added imagery that works great for a lot of people. Though I have met several who don't relate to their "Venus Star Point" - this is mostly true of Evening Star people who find the Morning Star rise far more accurate for them or for those with a different morning star point than the Heliacal rise.

However it does make it easy to create tables for this approach, yet leaves out the underworld and between dimensions as well as the chakra gates. Knowing where we are born into the story is richly revealing.

The best way to learn about any cycle but especially Venus is through our direct experience. So for those who are born into the situation where the Venus Sun conjunction prior to Venus Rising as Morning Star is in a different sign, let us know what your experience is?

If you have clients with this signature explore that with them and let's see how this shows up? This will be another rare timing as Venus only changes overtones every 96 to 112 years. Some will never experience an overtone shift, while others will only have it once. It is around the time of the shift to a New Overtone that the Sun conjunctions are usually in a different sign than the Overtone as is happening in October/November of 2018.

Capricorn Meta Goddess Life Experiences for Cayelin

1974 I graduated from High School in May and started college in August. Left that college in December of 1974 just as Venus was rising into the evening sky. Went to MIU (Maharishi International University in Fairfield, Iowa) in April of 1975 at Heart Chakra Gate.

1982 My first Son was born in July during the Morning Star Phase and moved unexpectedly 2 months later. In August of 1983 as the cycle was completing in the metamorphic underworld I had a miscarriage.

1990 February 4 got married for the second time while Venus was retrograde in the Morning Sky in a between Phase. In May my Bonus Baby youngest Son was born during the Morning Star Phase. Moved to a new home in November of 1990 as Venus was conjunct the Sun in the underworld phase.

1998 Found out my Mom had Cancer in July during the Morning Star Phase. She died 3 weeks later at the sacral chakra gate on August 18. I became the matriarch of the Family at age 42.

2006 Filed for Divorce in May at heart chakra gate, divorce was final during sacral chakra gate when I also legally changed my name choosing an entirely new name. Peter and I married in October when Sun, Venus and Mars were in the Inanna Underworld. Best Marriage Ever.

2014 Began our first Venus Alchemy Online Journey – it was incredibly transformative - informing much of what has been emerging into our understanding about Venus ever since.
