The Capricorn Goddess Morning Star Journey

January 14 - September 14

Venus/Inanna spends 8 months as Morning Star descending into the underworld and releasing all distortions and blocks in the way of her expressing her masterfully wise authentic self.

This occurs at each monthly Venus Moon Conjunction symbolizing the Chakra Gates as described in the tale of Inanna.

The Capricorn Goddess Evening Star Journey

Dec 1, 2022 to Aug 14, 2023

**Over 8 months, Evening Star Venus
reclaims her authentic Wise Goddess Self
ascending through the chakras
represented by monthly Venus Moon
conjuncts symbolizing her ability to
reclaim a healthy relationship with each
Chakra energy.**

**The Venus cycle ends and begins again
August 19, 2023 with the Leo
Radiant Self Love Meta Goddess on the
World Stage until March 2025**

The Capricorn Meta-Goddess Venus Cycle

January 14, 2022 to August 18, 2023

Venus Rises as a Morning Star every 584 Days and begins a new 19 month Cycle. Prior to her Morning Star Rise **Venus stations retrograde** in the evening sky on Dec 19, 2021 at 26 Cap 29 very near Pluto at 25 Cap 33.

Venus then disappears from the evening sky on Jan 02, 2022 at 22 Capricorn 22 dropping into the Metamorphic Underworld. Venus Spends 40 Days retrograde moving from evening star to morning star.

Retrograde Venus conjuncts the Sun Jan 08, 2020 at 19 Capricorn and a few days later **rises as a Morning Star** Jan 14, 2022 at 15 Capricorn 04 beginning a new 584 day cycle. **Venus stations direct** on Jan 29, 2022 at 11 Capricorn.

Venus spends 260 Days as a Morning Star beginning her descent into the underworld as she stations direct, meeting with the waning Moon 7 times (sometimes 8) going through these gates into the underworld. At each Gate Inanna gives up a vestment associated with the 7 (or 8) chakras releasing any distortions linked with these chakra energies.

Gate 1 – Crown Chakra - The Gate of Authority (removing her crown)

Gate 2 – Brow Chakra - The Gate of Perception (removing her royal staff)

- She is a wisdom teacher
- She is an elder energy - who cares for the generations to come
- She is Grand Mother Earth
- She is the Sage who reminds us to care for the Earth and each other
- Her most potent medicine is inspired wisdom showing us who we truly are

A Rare Triple Conjunction of Venus and Pluto 2021/2022

December 2021 to March of 2022 features a rare triple conjunction of Venus with Pluto in Capricorn

The third and final conjunction is on the 3rd of March very near the USA Pluto at 27 Capricorn 33 only 17 minutes from being precise.

Pluto entered Capricorn in 2008 and leaves in 2023/2024

Recently, the only other time this type of multiple conjunction was possible was in 2013/14.

In 2013, Venus passed Pluto on November 15 at 10 Capricorn.

In 2014, Venus (13 Cap 34) returned to be within just over 1 degree of Pluto (12 Cap 16) on Jan 30 the day Venus stationed direct - an almost double conjunction - definitely not a triple conjunction.

Dec 11 (25 Capricorn 19)
Dec 25 (25 Capricorn 43)
Mar 03 (27 Capricorn 50)

Last Triple Conjunction of Venus and Pluto in Capricorn

Nov 23, 1770 (15 Capricorn 53)
Jan 12, 1771 (17 Capricorn 21)
Feb 18, 1771 (18 Capricorn 37)

The last triple conjunction of Venus and Pluto in Capricorn was in 1770 to 1771, about 252 years ago if calculating from 1770. It was 243 years from 1770 to 2013.

On Jan 15, 1771 Venus rose as morning star at 15 Capricorn 44 within 2 degrees of Pluto at 17 Capricorn 33 (251 years ago in 2022).

A triple conjunction of Venus with Pluto won't happen again for 243 years in the Capricorn Cycle.

These Capricorn triple conjunctions only happen when Pluto is Capricorn and Venus is retrograde in Capricorn.

In 2264/2265 a triple conjunction of Venus and Pluto in Capricorn occurs 243 years from now having returned to another Capricorn Cycle. (Note: 243 is special number for Venus)

Also worth Noting in 2022:

Jan 14 Venus rises as Morning star on the day Mercury goes retrograde at 10 Aquarius 20.

Mercury stations direct at 24 Capricorn 22 on Feb 03 within 3 degrees of Pluto and 13 degrees of Venus.

Next Triple Conjunction of Venus & Pluto in Capricorn In 2264/2265

Nov 27, 2264 (19 Capricorn 18)

As the Gemini Cycle is completing

Jan 10, 2265 (20 Capricorn 42)

New Capricorn Cycle Begins January 16 at 17 Cap

Feb 23, 2265 (22 Capricorn 05)

On January 14, 2022

Venus is rising near the Stars Nunki (12 Cap 40) and Vega (15 Cap 34).

The next time this happens is in 2030 when Venus rises as morning star at 12 Capricorn 37 so even more precisely with Nunki starting in January 2030.

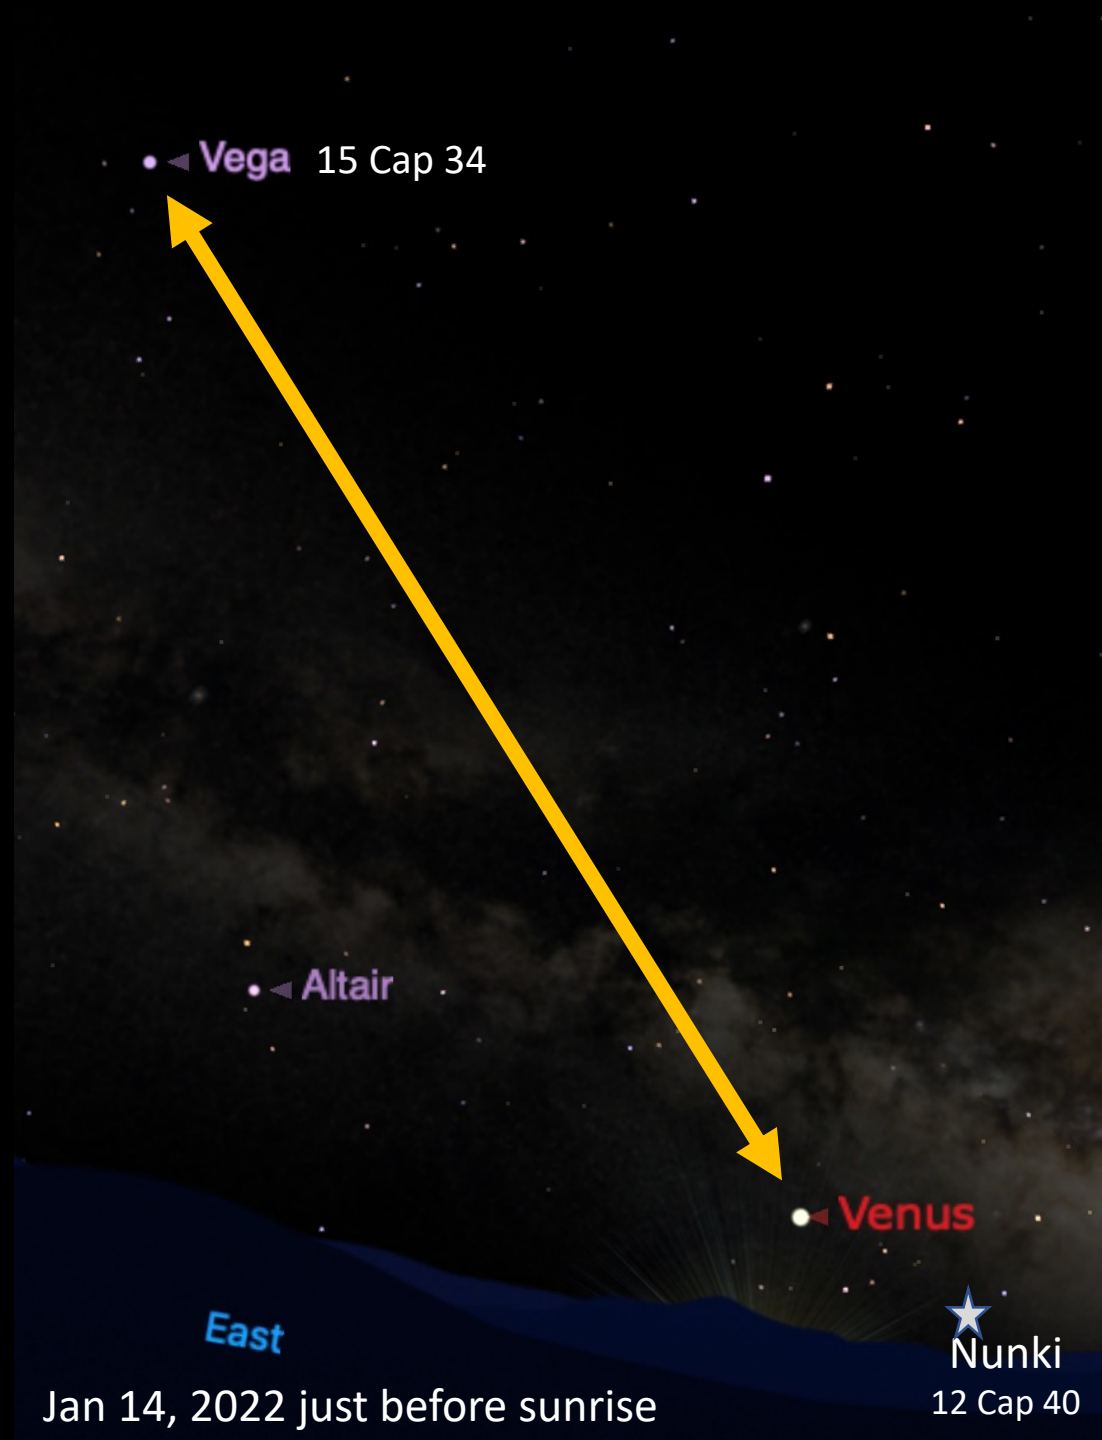

In 2022 Venus rises at 15 Capricorn 04 and Vega is currently at 15 Cap 34 making two more zodiacal degree passes in 2022.

Jan 13/14 Venus R Conjuncts Vega 15° Cap 36'

Feb 14 Venus D Conjuncts Vega 15° Cap 36'

AND in the Solstice Window on Dec 22, 2022 Venus is with Vega again at 15° Cap 37'

Significantly Vega is one of the Magical Stars of the Ancient Alchemist

Jan 14, 2022 just before sunrise

Nunki
12 Cap 40

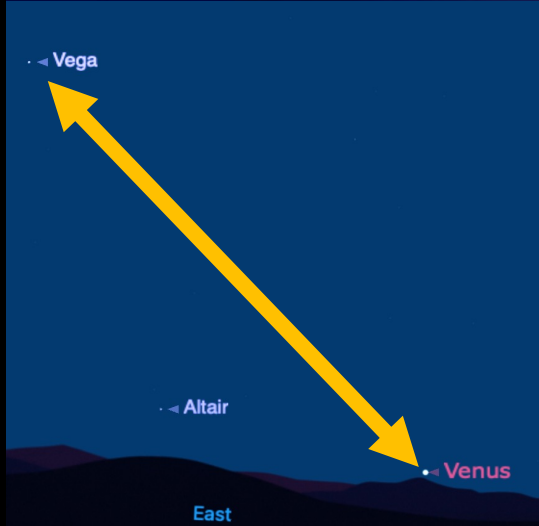

243 years from now, Venus rises as Morning Star in 2265 on January 17, 2265 at 17 Capricorn 30 and again eight years later on January 14, 2273 at 14 Cap 30.

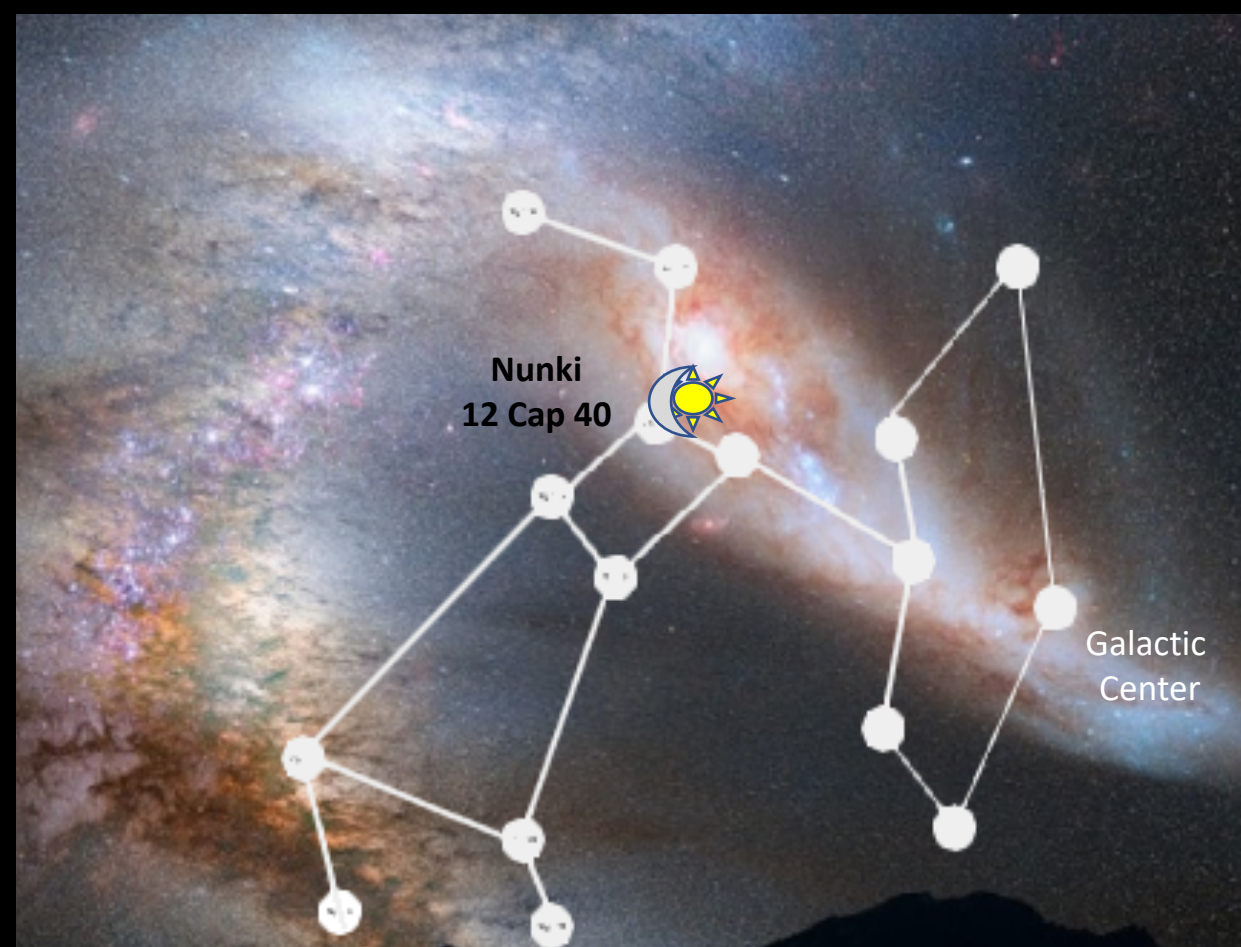

In 2265 Vega is around 19 Capricorn and Nunki is 16 Capricorn.

The last time Venus Rises as Morning Star in this Capricorn point of the pentagram is **December 31, 2069** at 00 Capricorn 13 on the Galactic Cross where the December Solstice Sun rises within a degree of the exact cross until at least Dec 21, 2070.

Venus rises as morning star in Sagittarius on Dec 28, 2077 having spent 96 years rising in Capricorn.

So, this Venus Rising and the one in 2030 are the closest risings with Nunki within the context of nearly 26,000 years.

The Archer's arrow is aiming at Galactic Center, the Alchemical Cauldron of Transformational Change where we are invited to release and let go of all our energetic distortions.

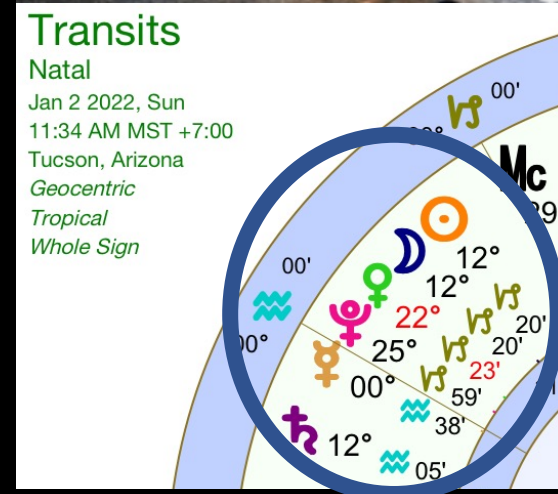

Nunki is the vane of the arrow or release point, sending all the old energy to the Galactic Cauldron where it can be renewed in the heart of our Galaxy energizing the wisdom of the heart to transform Earth's destiny.

Venus rising with Nunki highlights the importance of this powerful alchemy highlighting the wisdom of releasing and letting go, sending our distortions into the Alchemical Cauldron of Galactic Center.

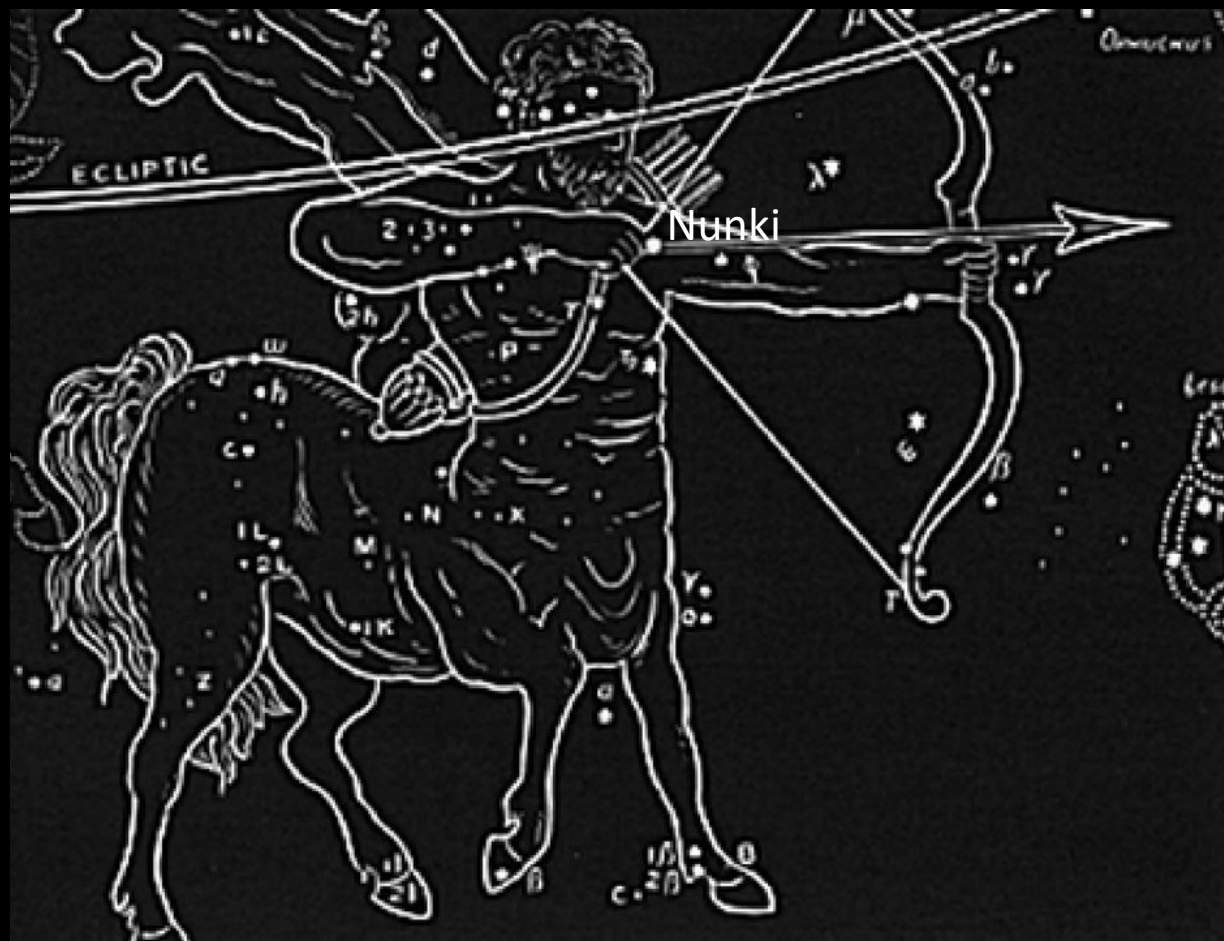

The Sun passes this star every year on January 2 or 3. In 2022 this happened on January 2 at the time of the New Moon.

We are currently experiencing a series of Moon occultations over Nunki helping to further activate the messages of transformation and acceleration coming through now.

The next Moon Nunki Occultation is January 29 when Venus is at the first gate releasing distortions around the crown chakra.

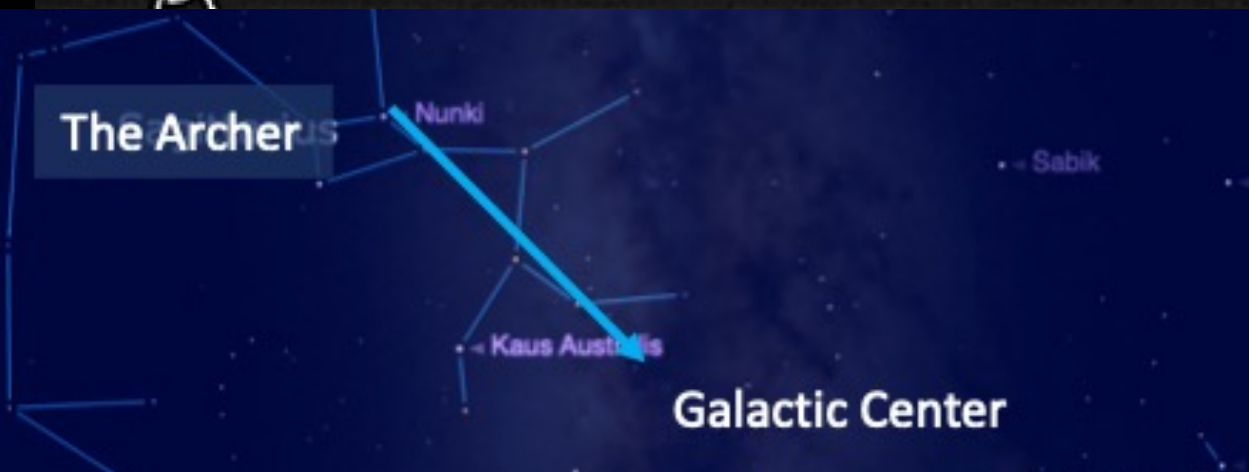

New Moon Jan 02, 2022
 within 20 minutes
 of being exact with Nunki
 the same day
 Retrograde Venus disappeared
 from the Evening Sky!

In the book *Star Light Elixirs and Cosmic Vibrational Healing* by Michael Smulkis and Fred Rubinfeld Nunki is described as ...

A star directly seeded by the center of the galaxy...

Emanating from the galactic center where creative force originates stimulating a new contextual view, a new idea, or a remembrance of an old idea now brought into form in a new way.

This theme will be very much a part of our Venus Journey

Vega One of the Magical Stars of the Ancient Alchemists

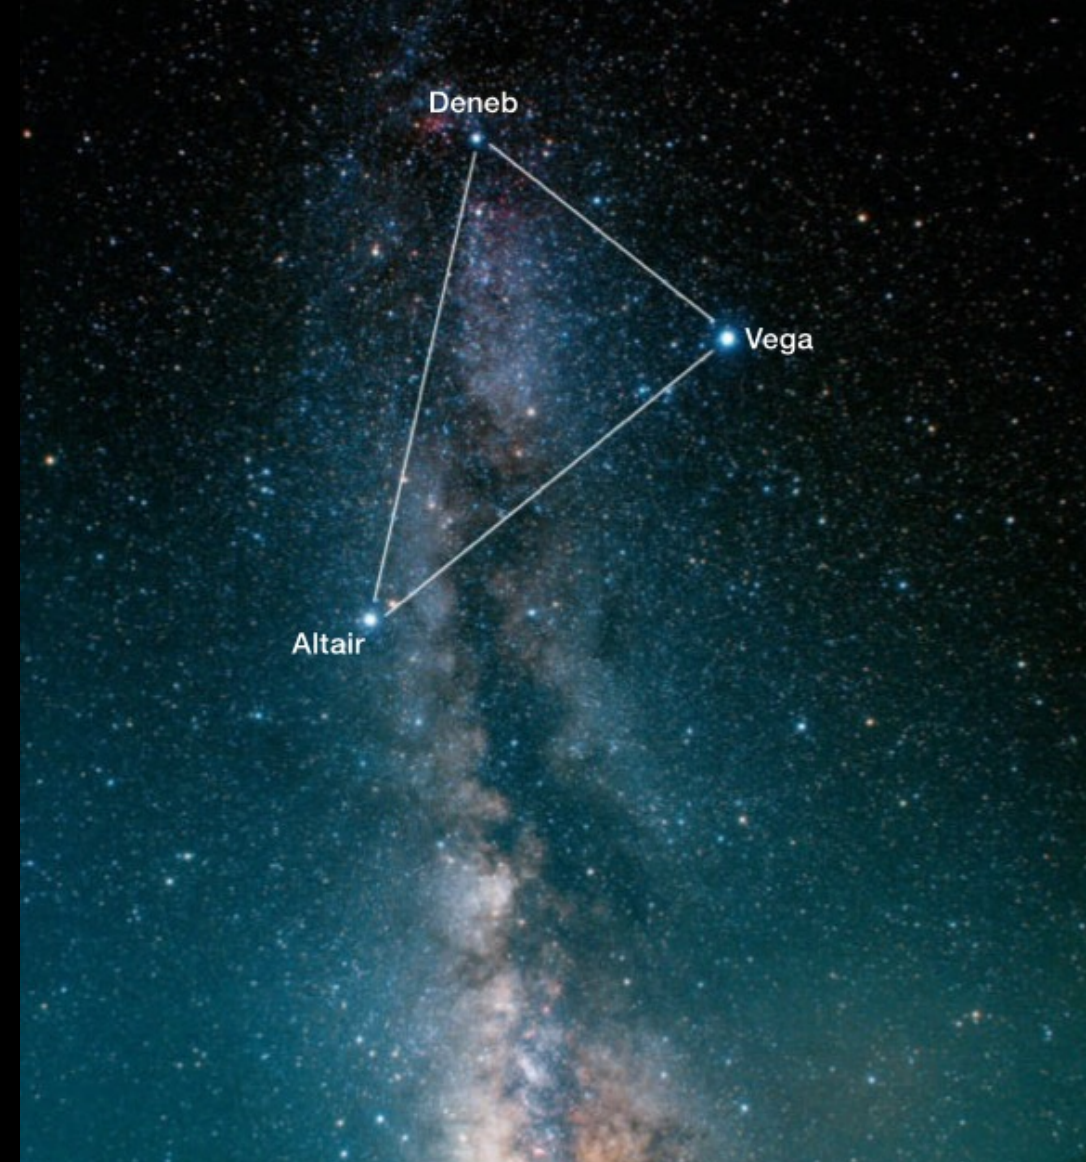

Vega is also known as the Vulture star and to the Egyptians she was the Goddess Nekhbet – transmitting her mysteries to the Earth through any planet aligned in the zodiacal degrees of Vega.

Every year the Sun is with Vega January 4, 5, and 6 in the constellation of Lyra around the annual passage of the Earth closest to the Sun (or perihelion).

This means the potency of the illumination coming to Earth when the Sun is aligned with Vega is further magnified due to Earth's closer proximity to the Sun.

The Sun is within 6 degrees of Vega from December 30 to January 12 every year.

Vega is the brightest star in the constellation Lyra and is the famous star Jodi Foster travels to in the movie Contact. In addition to being the bright pole star 13,000 years ago.

Vega is one of three bright stars in the Summer Triangle, and one of 15 magical Behenian Stars the ancient alchemists felt had the greatest potency when planets were within 6 degrees.

- Vega is known as “The Vulture Star” or “The Sitting Vulture” depicted with a lyre in her beak in the story of Orpheus, the musician who attempted to save his beloved from the underworld. Upon Orpheus’ death Jupiter (a.k.a Zeus) sent a vulture to rescue the Lyre out of the river and placed it in the sky.
- Vultures are often thought to be bad omens causing bad luck or even death.
- Vultures were also honored. In Egypt, the Vulture Goddess Nekhbet (a word also synonymous with Mother - Great Mother, Dark Mother, Grandmother - in ancient Egyptian) was highly revered.

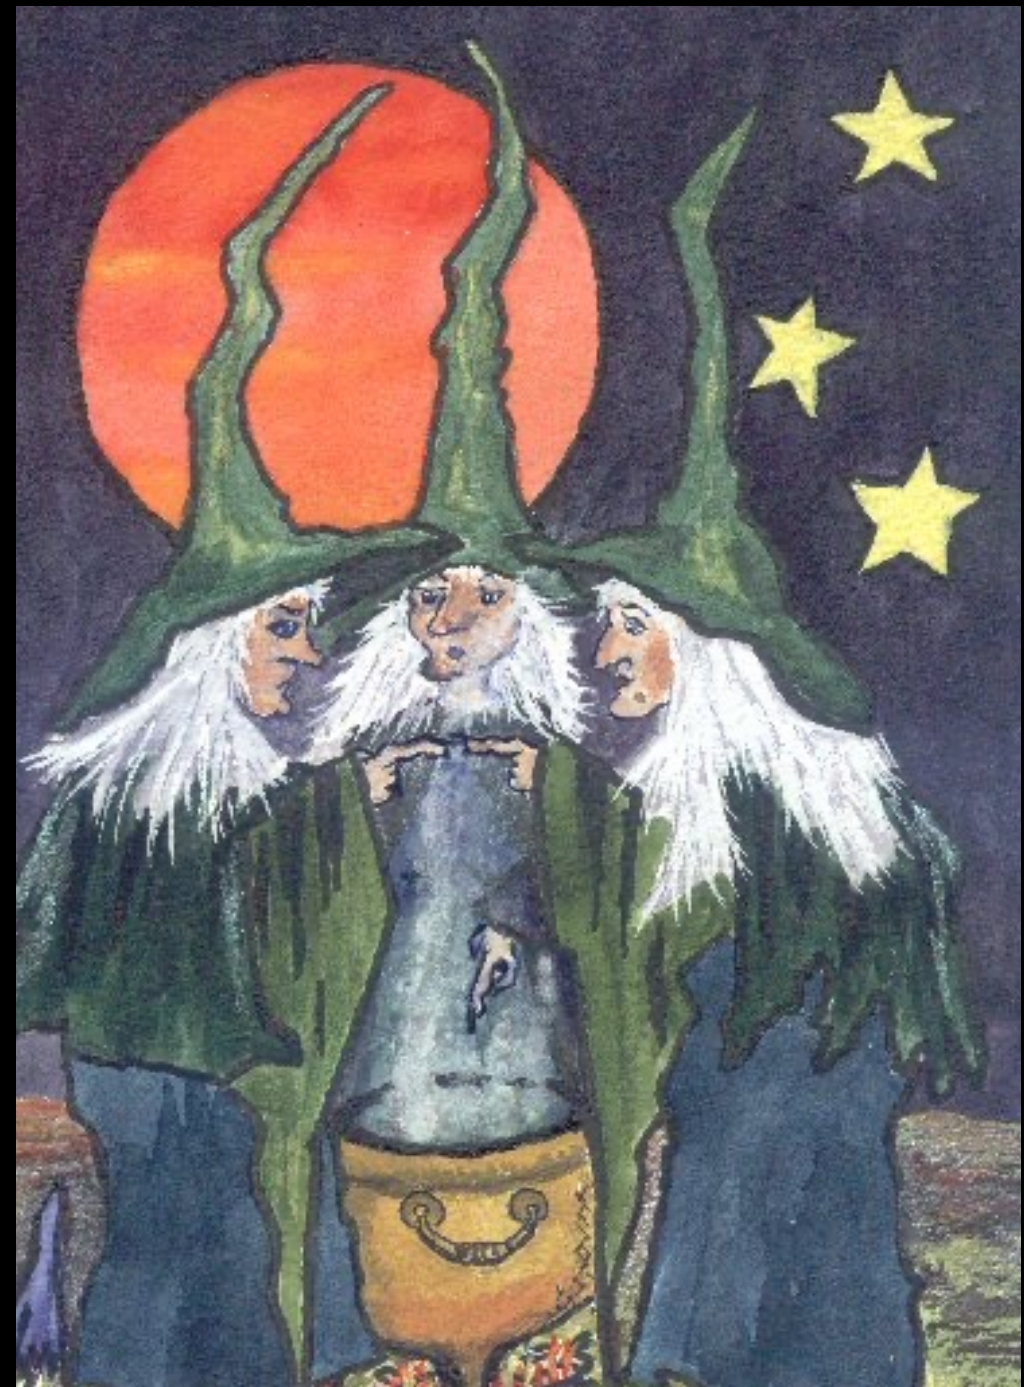

Vulture Medicine

- These medicine birds are great teachers in the realms of alchemy and efficient use of energy for joyful living.
- The scientific name for the Vulture is *Cathartes Aura* or “**Golden Purifier**” because Vultures turn death into life, cleaning and purifying the environment in the process.

- Vultures live in harmony with the Earth – so very Capricornian...
- They don't have to work at flying but rather endlessly soar on the air currents or thermals they see rising from the Earth assisting them in blissfully gliding upon those energy currents
- Suggesting they can assist us in seeing what we may not otherwise see – teaching us how to easily connect with the energy at hand for best results and about the usefulness of seeing subtle energy fields as well as seeing both multi-dimensionally and inter-dimensionally.
- **The Returning Power of the Divine Feminine**
This suggests we are entering a time when the Golden Purifier divine feminine energy of the Vulture as Nekhbet is again infusing the Earth with new Feminine Wisdom especially when Venus is aligned with this star as she begins a new 19-month cycle.
