Oct 30, 1775 at 27 Libra 20 (USA Meta Goddess is Libra) having risen as Libra Morning Star before the July 4, 1776 Declaration of Independence. The Birth Chart of the USA shows Venus entering the Underworld just 10° from the Sun with Venus 03° Cancer and the Sun at 13° Cancer and Jupiter close by at 6° Cancer)

Oct 05, 1863 at 01 Libra 28 marked the last time Venus Rose in Libra 155 years ago from 1863 to 2018

Oct 03, 1871 Venus rose as morning star at 29° Virgo

Sep 02, 1975 Venus rose as morning star at 29° Leo

Aug 01, 2087 Venus rises as morning star at 29° Cancer

In 2018 it was 251 years from 1767 when we had the last handoff between Aries and Libra

Morning Star Rise in Aries was April 1, 1766 at 01° Aries

First Morning Star Rise in Libra was Nov 02, 1767 at 29° Libra 45'

251 years later this handoff occurred again November 1, 2018 and

251 years from now it repeats in 2269.

In 2026 Venus rises as Morning Star in Libra exactly 251 years from the 1775 Venus Morning Star Rise at 27° Libra the same degree as 251 years earlier. This means the USA Venus returns begins on October 29/30 and will be exact on July 5, 2027 with Venus and the Sun near the exact same sign and degree 251 years earlier.

The Next Retrograde Morning Star Rise in Aries happens 155 years from the last Venus Rise in Aries in 2017 NOTE: for some it was 2025

Next Aries Cycle Begins April 27, 2172 (28° Aries)

Last Rise in Aries in this series is 96 years later on March 31, 2268 at 01° Aries

March 31, 2268 is the Last Rise of Venus in Aries

Future Retrograde Morning Star Rise in Libra

Begins Nov 01, 2269 at 29° Libra 08' (or 251 years from Nov 01, 2018)

The next handoff between Aries and Libra 251 years from 2018

There is a pattern of 155 years between the last rise of Venus in a Sign and Venus beginning to rise in that sign again. There is a 251 year pattern from the first rise of Venus in a Sign to the next first rise of Venus in a sign.

The 1920-Year Rotation: The Venus Pentagram (or Rose of Venus) completes one entire 360-degree rotation through all the signs of the zodiac in approximately **1,920 years**.

The pentagram pattern is fueled by the orbital resonance between Earth and Venus featuring the Earth moving around the Sun 8 times in 8 years and Venus moving around the Sun 13 times in the same 8 year Earth cycle. 5 Venus Cycles occur every 8 years connecting to the Fibonacci Sequence of 5, 8, 13

Every 1.6 years during Venus Retrograde, Venus meets with the Sun at the interior conjunction (a.k.a as inferior conjunction – meaning Venus is between the Sun and the Earth), tracing the 5 points of a pentagram over 8 years.

The Zodiacal Shift: These 5 points don't land in the exact same spot but rather shift 2° to 3° earlier every 8 years precessing into new signs every 96, 104 or 112 years.

The 251 Year Pattern: Sun and Venus return to the exact same sign and degree every 251 years.

The 155 Year Pattern: It takes 155 years for Venus to rise into the morning sky in the same sign it occupied 155 years earlier. This

243 and 365 pattern

Venus makes one full rotation on its axis every 243 days.

In 243 years Venus rotates 365 times.

Earth rotates 365 times in one year and there are 243 years between Venus transits over the Sun in the same area of the sky.
